I 100% support xm radio! Can anybody get along these days everyone is about to get anyone they can. Why can't they work "together" with xm radio to improve the weather forecast and traffic so they can also benefit from it. I think xm radio is wonderful and convenient for those on the road, "without commercial." These broadcaster should get a grip on reality and stop taking away other company rights to serve the public also. These broadcaster they just feel intimidated by xm radio because the listeners really do get what they want .
